

CALL FOR PAPERS

Important Dates (all deadlines are firm)

- Abstract registration deadline: February 10, 2014, 23:59 GMT
- Paper submission deadline: February 13, 2014, 23:59 GMT
- Author notification: April 13, 2014
- Camera-ready deadline: May 4, 2014

Suggested topics include but are not restricted to:

- Behavioral targeting
- Building and deploying privacy-enhancing systems
- Crowdsourcing for privacy
- Cryptographic tools for privacy
- Data protection technologies
- Differential privacy
- Economics of privacy and game-theoretical approaches to privacy
- Forensics and privacy
- Information leakage, data correlation and generic attacks to privacy
- Interdisciplinary research connecting privacy to economics, law, ethnography, psychology, medicine, biotechnology
- Location and mobility privacy
- Measuring and quantifying privacy
- Obfuscation-based privacy
- Policy languages and tools for privacy
- Privacy and human rights
- Privacy in ubiquitous computing and mobile devices
- Privacy in cloud and big-data applications
- Privacy in social networks and microblogging systems
- Privacy-enhanced access control, authentication, and identity management
- Profiling and data mining
- Reliability, robustness, and abuse prevention in privacy systems
- Surveillance
- Systems for anonymous communications and censorship resistance
- Traffic analysis
- Transparency enhancing tools
- Usability and user-centered design for PETs

Ethics

Papers describing experiments with users or user data (e.g., network traffic, passwords, social network information), should follow the basic principles of ethical research, e.g., beneficence (maximizing the benefits to an individual or to society while minimizing harm to the individual), minimal risk (appropriateness of the risk versus benefit ratio), voluntary consent, respect for privacy, and limited deception. Authors are encouraged to contact PC chairs before submitting to clarify any doubts. Also, authors may be asked to include explanation of how ethical principles were followed in their final papers should questions arise during the review process.

Author Guidelines

Submission guidelines, including formatting style and copyright agreement, will be available on PETS website (<http://petsymposium.org/2014>). Authors are encouraged to periodically check the website for announcements and updates.

Best Student Paper Award

The Andreas Pftzmann PETS 2014 Best Student Paper Award will be selected at PETS 2014. Papers written primarily by a student who is presenting the work at PETS 2014 are eligible for the award.

HotPETs

As with the last several years, part of the symposium will be devoted to HotPETs – the “hottest”, most exciting research ideas still in a formative state. See the HotPETs CfP for more information at <http://petsymposium.org/2014/hotpets.php>.

Organizers

General Chair (gc14@petsymposium.org):

Hinde ten Berge, *Free Knowledge Institute*

Program Chairs (pets14-chairs@petsymposium.org):

Emiliano De Cristofaro, *University College London*

Steven Murdoch, *University of Cambridge*

Publicity Chair (ctroncoso@gradient.org):

Carmela Troncoso, *Gradient*

HotPETs chairs (hotpets14@petsymposium.org):

Kelly Caine, *Clemson University*

Prateek Mittal, *Princeton*

Reza Shokri, *ETH Zurich*
