

Kostas Chatzikokolakis and Carmela Troncoso

Editors' Introduction

DOI 10.2478/popets-2019-0016

It is our great pleasure to introduce the second issue of the sixth volume of PoPETs, an open access journal that publishes articles accepted to the annual Privacy Enhancing Technologies Symposium (PETS). Recognizing the need to increase the free, public availability of scientific publications, PoPETs is published under the open-access Creative Commons Attribution-NonCommercial-NoDerivs license.

Since 2015 PoPETS/PETS follows the hybrid conference-journal model started by PVLDB, and now adopted by many other conferences in the field such as FSE, CHES, the IEEE Security and Privacy Symposium and the USENIX Security Symposium. This model has improved the quality of the published articles as well as both reviewers' and authors' experience regarding the review process. By enabling the resubmission of articles once comments from previous reviews have been addressed PoPETS provides a more predictable path to acceptance for authors while maintaining a high quality rigorous peer-review process.

PoPETS double-blind peer review process is similar to other top-tier computer security conferences, including phases for bidding, reviews, author rebuttals, discussion among reviewers, and consensus recommendation. By having four issues per year, and enabling resubmissions, PoPETs hopes to improve the quality of the published articles as well as the peer-review experience for both authors and reviewers.

Articles submitted to this issue were reviewed by 106 members of the Editorial Board and 75 External Reviewers. The submitted articles, reviews, and discussion were available to all members of the editorial board that did not have a conflict of interest with the authors of the article. To identify conflicts of interest, the editorial board membership was published before submissions were opened and authors were asked to indicate members with whom any of the authors had a conflict of interest. In addition, editorial board mem-

Carmela Troncoso: EPFL, E-mail: carmela.troncoso@epfl.ch

bers were asked to list the authors and institutions with which they have conflicts of interest. Finally, the editorial board chairs also checked for missed conflicts. Editorial board members were welcome to submit articles, while the chairs were precluded from doing so.

There were 71 submissions to this issue of PoPETs. Nine of the 71 submissions had been invited to resubmit after major revision in a previous issue, which were re-assigned to the editorial board members that had reviewed the previous version. Additionally, five articles that had been rejected from a previous issue were resubmitted to the journal, and were re-assigned to the same reviewers whenever possible. For all these resubmissions the authors provided a summary of changes between the prior and current version that explained how review concerns had been addressed.

In the second issue of 2019 we continued the consistency experiment started in the previous issue. The experiment consists in the following: we split the PC in two: PC-A and PC-B, making sure that both contain representative expertise in the topics relevant to PoPETS. Then, we randomly selected 20 newly submitted papers (i.e., we excluded resubmissions) to be reviewed by both PCs, and the remainder were assigned to one of the two committees uniformly at random. Members of each PC did not know whether a paper they review is also being reviewed by the other PC or not. Both PCs ran as usual, with the same phases and deadlines. At the end of the decision phase, we took the best of the two decisions for the paper, i.e. always benefit the authors, to avoid making them feel uneasy with the experiment. Authors were informed about whether their paper would get two sets of reviews or not.

We also introduced a 'fast check' at the beginning of the reviewing period in which we invited two experts to provide an opinion on papers for which it was not clear whether they are on scope. In the second issue 10 papers were selected for this process, and 3 were deemed out of scope by the experts.

Regarding the reviewing phases, in the first phase most of the submissions received four individual reviews (in a few cases, articles received three or more than four reviews; also, duplicated papers received two sets of reviews). Most articles had an external review drawn

¹ https://petsymposium.org/experiment.php

from a pool of young experts proposed by the community². Further external experts were invited to review certain articles where necessary. The reviews were sent to authors, who were given the opportunity to submit a rebuttal. After the rebuttal period there was a discussion among the reviewers, other members of the editorial board and the chairs to reach a consensus decision for each paper. One of the reviewers was then selected to write a meta-review that summarized the conclusion of the discussion and the justification for the decision.

Of the 71 submissions, seven were accepted with minor changes and eight were conditionally accepted subject to minor revisions. For the latter, a reviewer was assigned as a shepherd to ensure that the important points from the meta-review were addressed in the camera-ready version. Fifteen articles were ultimately accepted and are published in this issue and will be presented at PETS 2019, to be held on July 16–20, 2019 in Stockholm, Sweden.

The authors of 35 other articles were invited to resubmit to a future issue of PoPETs. Ten of them received a Major Revisions decisions and, if submitted to one of the next PoPETs two submission deadlines, will be reviewed by the same editorial board members who will judge if the major issues pointed in the meta-review are addressed. The remaining 25 received an encouraging meta-review that pointed revisions needed that were deemed too serious or too abstract to be addressed in short time. Seven papers were rejected due to them requiring a major rewriting that effectively results in a new paper, or due to not being considered sufficiently close to the topics listed in the call for papers. Finally, four papers were withdrawn by the authors before or during the reviewing period, and 10 submissions were desk rejected for being out of scope (7 clear cases decided by the chairs, and 3 by the fast check).

We thank the following people for making the second issue of PoPETs Volume 2019 possible:

General Chair for PETS 2019:

- Panagiotis Papadimitratos, KTH
- Simone Fischer-Hübner, Karlstad University

Program Committee Chairs / Editors in Chief:

- Kostas Chatzikokolakis, CNRS
- Carmela Troncoso, IMDEA Software Institute

Program Committee / Editorial Board:

- Ruba Abu-Salma, University College London (UCL)
- Gunes Acar, Princeton University
- Sadia Afroz, ICSI / Berkeley
- William Aiello, University of British Columbia
- Mashael Al-Sabah, Qatar Computing Research Institute
- Mario Alvim, Universidade Federal de Minas Gerais
- Abdelrahaman Aly, imec-COSIC, KU Leuven
- Sebastian Angel, University of Pennsylvania
- Hadi Asghari, TU Delft
- Foteini Baldimtsi, George Mason University
- Shehar Bano, University College London
- Kevin Bauer, MIT Lincoln Laboratory
- Lujo Bauer, Carnegie Mellon University
- Igor Bilogrevic, Google
- Cecylia Bocovich, University of Waterloo
- Nikita Borisov, UIUC
- Bogdan Carbunar, Florida International University
- Melissa Chase, Microsoft Research
- Chris Clifton, Purdue University
- Scott Coull, FireEve
- Jed Crandall, University of New Mexico
- Anupam Das, North Carolina State University
- Rinku Dewri, University of Denver
- Claudia Diaz, KU Leuven
- Serge Egelman, ICSI / Berkeley
- Tariq Elahi, University of Edinburgh
- Ittay Eyal, Technion
- Julien Freudiger, Apple
- Sébastien Gambs, Université du Québec à Montréal (UQAM)
- Paolo Gasti, New York Institute of Technology
- Yossi Gilad, MIT
- Rachel Greenstadt, Drexel University
- Jens Grossklags, Technical University of Munich
- Amir Herzberg, University of Connecticut and Bar Ilan University
- Nick Hopper, University of Minnesota
- Amir Houmansadr, University of Massachusetts Amherst
- Kévin Huguenin, Université de Lausanne
- Rob Jansen, U.S. Naval Research Laboratory
- Mobin Javed, LUMS/ICSI
- Philipp Jovanovic, EPFL
- Marc Juarez, KU Leuven
- Peter Kairouz, Stanford university
- Apu Kapadia, Indiana University Bloomington
- Aniket Kate, Purdue University

- Stefan Katzenbeisser, TU Darmstadt
- Florian Kerschbaum, University of Waterloo
- Boris Koepf, IMDEA Software Institute
- Markulf Kohlweiss, Edimbourgh University
- Yoshi Kohno, University of Washington
- Ponnurangam Kumaraguru, IIIT Delhi
- Alptekin Küpçü, Koç University
- Susan Landau, Tufts University
- Douglas Leith, Trinity College Dublin
- Janne Lindqvist, Rutgers university
- Chang Liu, Berkeley
- Wouter Lueks, EPFL
- Ashwin Machanavajjhala, Duke University
- Ivan Martinovic, University of Oxford
- Nick Mathewson, Tor Project
- Michelle Mazurek, University of Maryland
- Susan McGregor, Tow Center for Digital Journalism & Columbia Journalism School
- Sarah Meiklejohn, University College London
- Alan Mislove, Northeastern University
- Prateek Mittal, Princeton University
- Pedro Moreno-Sanchez, TU Wien
- Takao Murakami, National Institute of Advanced Industrial Science and Technology (AIST)
- Steven Murdoch, University College London
- Arvind Narayanan, Princeton University
- Melek Önen, EURECOM
- Cristina Onete, Universite de Limoges / XLIM
- Claudio Orlandi, Aarhus University
- Rebekah Overdorf, KU Leuven
- Catuscia Palamidessi, INRIA
- Panagiotis (Panos) Papadimitratos, KTH
- Charalampos Papamanthou, University of Maryland
- Nicolas Papernot, Google Brain
- Paul Pearce, UC Berkeley
- Bart Preneel, KU Leuven
- Ananth Raghunathan, Google Brain
- Joel Reardon, University of Calgary
- Alfredo Rial, University of Luxembourg
- Franziska Roesner, University of Washington
- Thomas Roessler, Google
- Phillip Rogaway, UC Davis
- Stefanie Roos, TU Delft
- Ahmad-Reza Sadeghi, Technische Universität Darmstadt
- Peter Schwabe, Radboud University
- Zubair Shafiq, University of Iowa
- Reza Shokri, National University of Singapore
- Claudio Soriente, NEC
- Anna Squicciarini, Penn State University

- Theresa Stadler, Privitar
- Nick Sullivan, Cloudflare
- Paul Syverson, U.S. Naval Research Laboratory
- Nina Taft, Google
- Hassan Takabi, University of North Texas
- Doug Tygar, UC Berkeley
- Narseo Vallina, IMDEA Networks Institute
- Joris Van Hoboken, University of Amsterdam & Vrije Universiteit Brussels
- Eugene Vasserman, Kansas State University
- Tara Whalen, Google
- Philipp Winter, UC San Diego / CAIDA
- Matthew Wright, RIT
- Thomas Zacharias, University of Edinburgh
- Daniel Zappala, Brigham Young University
- Ben Zhao, University of Chicago

Publications Chairs:

- Vasilios Mavroudis
- Philipp Winter

Video Chair:

- Aaron Johnson
- Ryan Henry

Publicity Chairs:

- Rebekah Overdorf
- Kat Hanna

Web Chairs:

- Ian Goldberg
- Kat Hanna

Sponsorship Chairs:

- Steven Murdoch
- Rachel Greenstadt

We thank the following shepherds:

- Tariq Elahi
- Julien Freudiger
- Alan Mislove
- Thomas Roessler
- Reza Shokri
- Doug Tygar
- Thomas Zacharias

Daniel Zappala

We thank the following external reviewers:
